IMDrexel

Improving the intramural sport experience at Drexel University

Problem

The current intramural sports website doesn't encourage new players to join with their overused ads, confusing location maps, and unnecessary options.

What We Have

The player can... Login with your drexel email, browse available leagues, join a team, see upcoming and past games, view profile, view league teams, and more!

Frameworks

IMDrexel is powered by the **Node.js** framework and **Amazon RDS with MySQL**. The front-end runs on **HTML**, **CSS**, **Bootstrap 4**, and **Javascript**.

IMDrexel Future

The administration side is next on our bucket list. We want the administrators and scorekeepers to easily manage and control the leagues and games.

Also, individual stats, automatic game scheduling, playoffs scheduling, and interactive maps are just a few cool features we plan to add.

Let us know what you think at **IMDrexel@gmail.com**!
